## Tea.java

**Attributes**
- + String[] _data;
- ± int _sizeY;

**Cons**
- + Tea()

**toString** + String toString()

**Methods**
- + void populate ()
- + static int size (String[] arr)
- + void addArr (string[] newArr)
- + void add (String symFlav, String tea)
- + void add (string symFlav1, string symFlav2, String symFlav3, String tea)
- + void add (string symFlav1, string symFlav2, String, symFlav3, String symFlav4, string symFlav5, String Tea)
- - void expandX (int row)
- - void expandY ()
- + get String[] get (int row)   + String get (int row, int col)
- + String[] set (int index, string[] newVal)
- + void sort()   + String[] locate (String symFlav)
- + main

## Database.java

**Attributes**

**Methods**
- + static void printinformation (String tea)
